Subject: Microsft Settlement - NOT

I really am incredulous over the blatantly biased so-called Microsoft settlement. This is a settlement that would effectively (once again) provide this monopolistic monster with yet another leg up into infiltrating the school systems with their brand of garbage and unfairly compete with Apple Computer. Do the people brokering this deal really believe that US Citizens are this stupid and can't see the huge bias at work here? This settlement effectively gives Microsoft a tax break, great public relations, and an unfair advantage into the school systems. All the while, Microsoft continues its' monopolistic practices in a variety of other venues. Obviously, their money has a lot of clout with the government and the people who have complained the loudest are once again being shoved aside.

I'm extremely displeased with this decision and will vote accordingly in the next election.
